

5-space bike rack for urban furniture h140261

Galvanized steel bike rack. Gunmetal finish. Suitable for 5 spaces. Total length: 281 cm.

The **rack** represents an essential piece of furniture for streets, public parks, squares, or condominiums to manage bicycle parking in an orderly and safe manner.

The bike rack is designed for **5 spaces** with fixing via extension of the support pillars into the ground.

Structure composed of **two support pillars in round galvanized steel tube**, complete with semi-spherical PVC caps.

The **bike-holder brackets** consist of a single block of metal elements welded together, each of which includes the two parallel wheel-holder brackets and a bracket placed at the side for hooking the bicycle to the structure.

The **wheel-holder brackets** alternate and are **staggered** in height, which facilitates a simpler insertion of the bicycle into the relative housing.

Once the front wheel is placed in the bike-holder brackets, the bicycle does not fall but remains steady in balance thanks to the presence of the wheel-holder brackets. The user can then proceed to the bike locking phase with complete peace of mind.

The side brackets allow for quick attachment and detachment of the anti-theft chain operating at a height of 80 cm from the ground; no user will therefore be forced to bend down to the ground or perform actions with particular physical effort or discomfort.

The finish for the metal parts is "**gunmetal**" color and the painting technique used for the galvanized steel structure is thermosetting powder coating with oven curing.

Technical features:

- Bike rack
- 5 spaces
- Material: galvanized steel
- Finish: gunmetal
- Total width: 281 cm
- Total depth: 80 cm
- Height above ground: 86.5 cm
- Part to be buried: 30 cm
- Weight: 58 kg
- Assembly kit, stainless steel hardware, and assembly instructions included

INFORMATION

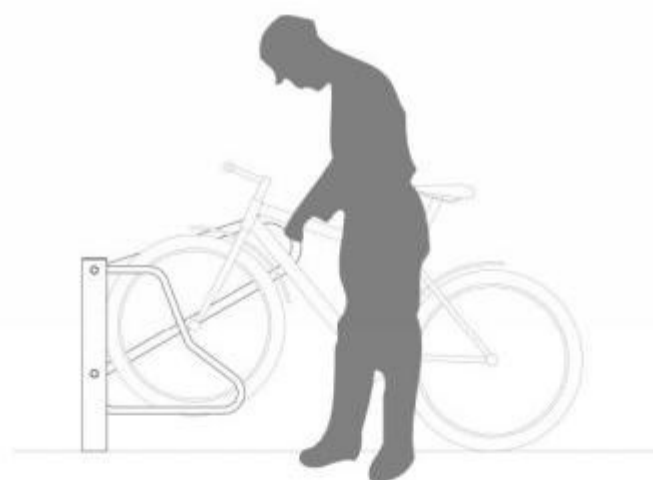

- **Material** Steel
- **strengths** di design , mono-facciali
- **length** 2810 mm
- **fixing** da interrare
- **places** 5
