

50 m floating lane for swimming pool h1009_04

50 m floating lane h1009_04 for swimming pool with Ø85 mm anti-turbulence PP disk and plastic-coated AISI316 stainless steel. For training.

The **50 m Galician Lane for swimming pool h1009_04** is an accessory for 50-meter swimming pool facilities (Olympic Basque) designed for training sessions. This product solves the operational problem of large wavy lane lines and the difficult handling of the boundary line, offering a solution with disks designed to reduce turbulence which, solely due to the small diameter, facilitates storage and transport. Intended for sports center managers, without publication and with new clubs, the 50-meter lane is made with Ø 85 mm disks (14 meters) in polypropylene (PP) with high-quality additives to resist chemical agents and the atmosphere, assembled with a Ø 6 mm plastic-coated AISI316 stainless steel rope. The setup includes high-density polyethylene PE-HD pool floats (7 every meter) and is available as standard in blue, red, and white, with the possibility of creating additional colors of your choice.

Technical features

- **Type and use:** Floating lane suitable for training
- **Length:** 50 meters
- **Materials:** Polypropylene (PP) with high-quality additives resistant to chemical and atmospheric agents
- **Disk dimensions and density:** Ø 85 mm (14-meter disks)
- **Disk geometry:** Designed to reduce turbulence
- **Assembly support:** AISI316 stainless steel rope, plastic coating, Ø 6 mm
- **Floats:** Floating balls in high-density polyethylene (PE-HD), 7 every meter
- **Standard colors:** Blue, red, white
- **Color variants:** all colors available upon request and verification
- **Physical property:** reduced diameter of the disks to facilitate storage and transport
- **Stainless steel springs and tensioners** (the most complete and premium setup)
