

500-liter spill pallet for 4 drums h836_32

Sump pallet h836_32 for 4 drums, 500-liter capacity with metal grid. High-visibility yellow structure for hazardous liquids.

The **h836_32 spill pallet** is a technical solution designed to ensure maximum safety in the **storage and management of hazardous or polluting liquid substances**. This system is essential for protecting work environments and the soil from accidental spills of oils, paints, solvents, and chemicals, solving criticality issues related to environmental compliance in industrial and logistics settings.

The structure, characterized by its remarkable robustness, is equipped with an **upper metal grid** that ensures stable and level support for the drums, preventing direct contact with the bottom of the pallet. The optimized vertical footprint design facilitates **loading and unloading** operations using pallet trucks or forklifts, making the management of industrial liquids efficient and safe.

Technical features

- **Dimensions:** L. 1350 x W. 1350 x H. 490 mm
- **Collection capacity:** 500 liters
- **Grid material:** resistant metal
- **Pallet color:** high-visibility yellow
- **Load capacity:** housing for up to 4 drums
- **Configuration:** drums and additional trays not included in the supply
