

6-level storage pallet h750_06

AISI 304 stainless steel pallet with 6 levels, 300 hooks and 6 wheels, ideal for storing meat and cured meats in butcher shops and meat processing industries.

Professional pallet in **AISI 304 stainless steel** designed for the storage and transport of meat and cured meats in butcher shops, slaughterhouses and industries dedicated to meat processing. The **6-level** structure with **12 folding bars** (4 per level) allows for efficient vertical organization of space. The **300 hooks** distributed on the structure facilitate the orderly storage of products during storage and handling. The **6 wheels** provide stability and practicality in transport, reducing physical effort and ensuring high maneuverability even in tight work environments.
