

610-liter self-tipping skip h1004_07

610-liter self-tipping skip in 2.5 mm steel, capacity 1500 kg. Automatic emptying and polyurethane wheels for industrial logistics. The **h1004_07 610-liter self-tipping skip** represents an advanced technical solution for optimizing the collection, handling, and disposal processes of bulk materials or industrial waste. Designed for intensive use in production and logistics environments, this unit facilitates the rapid discharge of materials thanks to the **automatic front tipping mechanism**, which can be operated directly via forklift, eliminating the operator's physical effort and increasing safety at work.

Robustness is guaranteed by a structure in **2.5 mm steel sheet** with reinforced **watertight** welds, a feature that makes the container also suitable for managing wet waste or waste contaminated by liquids without the risk of leaks into the work environment. With a **maximum load capacity of 1,500 kg**, the skip ensures structural reliability even under heavy loads.

Technical features

- **Capacity:** 610 liters
- **Material:** 2.5 mm thick steel sheet
- **Maximum load capacity:** 1,500 kg
- **Empty weight:** 152 kg
- **Overall dimensions:** W. 1545 x D. 1000 x H. 1080 mm
- **Internal dimensions:** W. 1490 x D. 910 x H. 740 mm
- **Handling system:** 2 fixed wheels + 2 swivel polyurethane wheels Ø 150 mm
- **Discharge mechanism:** automatic front tipping via forklift
- **Finish:** Standard Blue Ral 5010 painting
- **Certification:** CE mark compliant with European regulations
