

8-space bicycle rack h1003_03

Double-sided painted galvanized steel bike rack, zig-zag design. Dimensions: W 150 x D 64 x H 40 cm.

The **H1003_03 double-sided bike rack** is a **modern and functional urban furniture** solution, designed to offer **order, safety and style** in public and corporate spaces. Its **zig-zag design**, in addition to being aesthetically distinctive, allows for **secure and effective locking of bicycles**, making it ideal for high-traffic contexts such as **schools, offices, squares, stations and parks**.

Made of **galvanized steel** and subsequently **powder coated with thermosetting polyester powders**, this rack is designed to resist **weathering agents, wear and vandalism**, ensuring **long life and low maintenance**. Ground fixing is provided via **pre-drilled flanges**, to be installed with **anchors not supplied**.

With **8 bike spaces** arranged in a **double-sided** configuration, the bike rack optimizes the use of space and easily adapts to any urban configuration thanks to its **modular structure**. It is available on request in **various RAL colors**, to integrate harmoniously into any architectural context.

Make your public or corporate area more accessible and organized. Purchase the **H1003_03 rack** now or contact us for offers on multiple supplies or color customizations.

FAQ:

1. **Is the bike rack also suitable for school or corporate environments?**
Yes, it is ideal for schools, companies, public bodies and urban contexts.
2. **Is ground fixing mandatory?**
It is strongly recommended to ensure stability and safety, using anchors (not included).
3. **Is it possible to choose a custom color?**
Yes, the rack is available in various colors from the RAL chart.
4. **Can it also be used for scooters?**
It is primarily designed for bicycles, but can accommodate some scooter models depending on the width.
5. **How many bike spaces does the structure offer?**
The H1003_03 model can accommodate up to 8 bicycles, arranged on both sides.

Mini buying guide:

When choosing racks for public or corporate environments, it is important to evaluate **sturdiness, capacity, type of fixing and aesthetic integration**.

The **H1003_03** rack offers **8 bike slots**, a **painted galvanized steel** structure and a **double-sided modular design** that maximizes functionality even in small spaces.

Secure fixing and the possibility of choosing **custom colors** make it suitable for **urban, school or corporate projects** where style and practicality must coexist.

8-space double-sided bike rack, outdoor galvanized steel bicycle rack, powder-coated urban furniture rack, bike rack for schools and public spaces, ground-fixed rack with flanges.
