

8-tier tray trolley h464_239

Low stainless steel tray trolley (65x44x90 cm) for 8 GN 1/1 trays. Ultra-robust welded structure, 250 kg capacity and top work surface.

The **professional stainless steel tray trolley** is a compact and high-resistance solution, designed to optimize space in small catering businesses, delis, and laboratories. Made with a **fully welded construction**, this model offers superior structural solidity compared to classic kit trolleys, eliminating vibrations and guaranteeing a **maximum load capacity of 250 kg**. The height of 90 cm makes it extremely versatile: in addition to carrying up to **8 GN 1/1 trays**, it serves as a practical **mobile work surface** for plating or preparation operations. Movement is smooth and safe thanks to the swivel wheels equipped with round bumpers, essential for protecting walls and furniture.

Technical characteristics

- **Material:** High-quality stainless steel
- **Configuration:** 8 levels + top work surface
- **Compatibility:** Gastronorm GN 1/1 containers (not included)
- **Total dimensions:** L. 65.5 x D. 44.5 x H. 90 cm
- **Space between tiers:** 81 mm (optimal for ventilation and versatility)
- **Maximum capacity:** 250 kg (reinforced structure)
- **Execution:** Fully welded (maximum stability)
- **Movement:** 4 swivel wheels (2 with parking brake)
- **Safety:** Round bumpers (shock absorbers) on all wheels

INFORMATION

- **Length in millimetres** 445.000000
- **Depth in millimetres** 655.000000
- **Height in millimetres** 900.000000
- **size pans** GN 1/1 - 53 x 32,5 cm
- **capacity** 8 teglie
