

9-space steel bicycle rack h14065

Galvanized steel bike rack with concrete supports. 9 staggered spaces. Brilliant silver finish. Dimensions mm 2810x780x550h. Made in Italy

The **bicycle rack** allows for the creation of safe parking areas for bicycles. Thanks to its compact structure, this bike rack can be positioned near parks, schools, city centers, and offices.

The h14065 rack is characterized by the use of **concrete** supports, which have a slot in the outer part. These two supports are connected by **horizontal connection crossbars in galvanized steel rectangular tube**, complete with supporting feet. The **arch-shaped wheel-holder brackets** also offer **convenient** and **easy parking** for bicycles.

To optimize the available space and accommodate up to 9 bicycles, the wheel-holder brackets are specifically staggered.

The structure can be anchored to the ground using anchor bolts and expansion plugs. The galvanized steel parts are painted with a special **anti-corrosion treatment** and a brilliant aluminum finish, while the **concrete supports** are treated with **anti-degradation liquid** and are white in color.

Technical characteristics:

- Dimensions: mm 2810 x 780 x 550 (L x D x h)
- Structure: in galvanized and painted steel
- Finish: brilliant aluminum
- Sides: in white CLS concrete with anti-degradation treatment
- Horizontal crossbar dimensions: rectangular tube mm 50 x 20 x 1.5
- Wheel-holder bracket dimensions: oval tube mm 40 x 20 x 1.5
- Wheel insertion thickness: 5 cm
- Anti-corrosion treatment
- Fixing: removable or to be bolted to the ground
- Assembly kit: stainless steel screws and instructions
- Weight kg. 139
- **Made in Italy**

INFORMATION

- **Material** Steel
- **strengths** amovibili con base in cemento, bi-facciali, ingombro ridotto
- **Typology** al suolo
- **length** 2810 mm
- **fixing** removable
- **Color** alluminio brillante
- **places** 9
