

## 95-litre recycling container h957\_61

Recycling bin with 3 compartments of 95 litres in DC01 steel. Includes 3 galvanized internal containers, coloured lid and M1 fireproof certification.

The **h957\_61 recycling container** is a professional indoor recycling station, designed to combine a high volumetric capacity of **95 litres** with a compact and functional design. Made of **cold-rolled steel sheet (DC01 Quality)**, the black body integrates with a RAL 9006 grey top lid, easily removable for maintenance operations. The waste management system is optimized by **three circular openings** identified by coloured edges (blue, yellow and brown) that guide the user towards correct disposal. Inside, the bin houses **three removable galvanized sheet metal containers**, ensuring maximum hygiene and ease of emptying. The structure is completed by a PVC base with a metal insert and a high-resistance fireproof polyester resin finish.

## Technical features

- **Dimensions:** 64.5 cm x 22.5 cm x 70 cm (Height)
- **Total capacity:** 95 litres
- **Net weight:** 17 kg
- **Body material:** Cold-rolled white sheet metal (DC01 Quality, EN 10130 standard)
- **Internal containers material:** Cold-rolled galvanized sheet metal (DX51D Quality, EN 10346 standard)
- **Base:** Black PVC with metal insert
- **Painting:** Electrostatic with fireproof polyester resin (thickness 60 microns)
- **Fire reaction classification:** A2-s1, d0 (UNE-EN 13501-1) and M1 (UNE 23727)
- **Lid configuration:** 3 openings with blue, yellow and brown edges
