

98x98 rubber tile for playgrounds h34007

Safety flooring tile in two-layer EPDM rubber, easily assembled. Dimensions: 98x98 cm. Available in multiple thicknesses

Safety **shock-absorbing flooring for playgrounds** with a substrate in expanded rubber agglomerate and a surface layer of rubber granules with a mass-colored EPDM finish. Ideal for cushioning falls and protecting against potential trauma. Suitable for use under all play equipment requiring a fall protection area according to the UNI EN 1176 standard

Installation

Bonding with polyurethane adhesives – approximately 500 gr./pc (adhesive not included)

- directly to the substrate on surfaces such as asphalt, concrete, wood
- via eco-base or eco-rubber on surfaces that cannot otherwise be glued, such as packed earth or other well-compacted surfaces
- not suitable for unstable and non-compact surfaces

Technical features:

- top finish: width 98 x length 98 cm
- thickness 25 mm - weight 13 kg - certified fall height up to 1.68 m on concrete, asphalt
- thickness 40 mm - weight 18 kg - certified fall height up to 2.25 m on concrete, asphalt
- thickness 65 mm - weight 26 kg - certified fall height up to 3.60 m on concrete, asphalt
- red color
