

98x98 tile coated in synthetic grass h34008

Safety flooring for playgrounds in soft foam rubber with synthetic grass coating. Dim: 98x98 cm. Available in multiple thicknesses

Anti-trauma tile for the realization of safety flooring for all areas where play equipment is located.

Composition:

- Lower layer: mixture of different expanded rubbers with high anti-shock absorption
- Surface finish: 25 mm curled synthetic grass

Usage

protection from fall-related injuries; under all equipment that requires a fall protection area according to the UNI EN 1176 standard

Installation:

bonding with two-component polyurethane adhesive. Yield approximately 500 g/pc.

- directly to the substrate on surfaces such as asphalt, concrete, wood
- via eco-base or eco-rubber on surfaces that cannot otherwise be glued, such as beaten earth or other well-compacted surfaces
- not suitable for unstable and non-compact surfaces

Suitable surfaces: concrete, asphalt and wood

Color: bright green

Performance:

- thickness 25 mm- 8 kg- certified fall height 1.69 m
- thickness 40 mm- 13 kg- certified fall height 2.23 m

INFORMATION

- **Width** 98 cm
- **length** 98 cm
