

Absorbent kit in container for universals h1043_56

Absorbent kit for universals h1043_56 in a 108 lt polypropylene container. With pads, socks, and White Sorb bag. Min absorption 98 lt.

The **absorbent kit in container for universals h1043_56** is a compact emergency response system designed to promptly and effectively address decontamination issues within work environments exposed to environmental risks. Developed for **safety managers, industrial technical offices, workshop managers, warehouses, and production plants**, this kit meets the need for ready-to-use anti-pollution devices. The product solves the main operational problem of **blocking, containing, and collecting accidental spills of various industrial liquids, preventing floor contamination and the runoff of harmful substances into municipal drains**. Entirely housed within a heavy-duty 108-liter polypropylene chest, the set integrates a calibrated assortment of absorbent pads, flexible socks, and loose particulate, ensuring a minimum absorption capacity of 98 liters. The internal composition and geometric organization of the kit are visually detailed in the technical documentation attached in the file image_e237df.png.

Technical features

- **Model:** FOR UNIVERSALS
- **Plant type:** emergency response kit in container designed to meet decontamination issues
- **Main component materials:** polypropylene, nylon
- **Structural mass of the empty chest (Container weight):** 6.3 kg
- **Volumetric capacity of the container:** 108 lt
- **Overall geometric dimensions (W x D x H):** 650 x 500 x 570 mm
- **Guaranteed minimum absorption capacity:** LT. 98
- **Absorbent pads supply:** 75 PADS measuring 41 x 46 cm
- **Supply of barriers/cylindrical socks:** 6 SOCKS with diameter Ø 7.6 cm and length 122 cm
- **Loose absorbent supply:** 1 WHITE SORB BAG
- **Personal protective equipment included:** 2 GLOVES
- **Confinement and collection accessories:** 3 DISPOSAL BAGS
- **Information support for emergency teams:** 1 INSTRUCTION MANUAL
