

Accordion barrier h972_03

Extendable steel barrier with a maximum length of 3 meters, ideal for delimiting hazardous areas. Dimensions: L 300 × D 41 × H 160 cm.

The **H972_03 accordion barrier** is designed to **delimit risk areas and prevent unauthorized access**, reducing the risk of accidents in industrial environments, construction sites, warehouses, and parking lots.

Made of **epoxy-coated steel**, it is highly **resistant to atmospheric agents and UV rays**, ensuring **durability and reliability** even for prolonged outdoor use. The **expandable system** allows reaching a maximum length of **3 meters**, adapting to various delimitation needs.

Equipped with **4 wheels, 2 of which have brakes**, it ensures **mobility and stability**, allowing for quick movement and secure positioning. When not in use, it **folds compactly**, reducing its footprint and facilitating storage.

Thanks to its **high-visibility red/white coloring**, it is clearly visible even from a distance, improving the signaling of restricted areas.

Protect and delimit areas with the **H972_03 extendable barrier**! Safe, stable, and easy to move. **Buy now or request a personalized quote.**

Technical features:

- **Material:** UV-resistant epoxy-coated steel
- **Color:** High visibility Red/White
- **Maximum extended length:** 3 meters
- **Closed dimensions:** Compact to reduce footprint
- **Wheels:** 4 wheels, 2 of which with brakes
- **Weight:** 26 kg
- **Dimensions:** L 300 × D 41 × H 160 cm

User benefits:

- **Immediate safety:** Ideal for delimiting risk zones and preventing accidents.
- **Robust structure:** Epoxy-coated steel for strength and durability.
- **High visibility:** Red/white color for clear and effective signaling.
- **Easy to move:** Integrated wheels for optimal mobility.
- **Stable and safe:** 2 wheels with brakes for firm fixing.
- **Space-saving:** Folds compactly for a reduced footprint.

FAQ:

1. **Can the length of the barrier be adjusted?**
Yes, the expandable structure allows for adjustment up to 3 meters according to needs.
2. **Do the wheels have a locking system?**
Yes, 2 of the 4 wheels are equipped with brakes, ensuring stability during use.
3. **How much space does it take up when closed?**
The barrier folds compactly, reducing its footprint for easy transport and storage.

4. Can it be used on construction sites and in warehouses?

Yes, it is perfect for delimiting lanes, work areas, entrances, and danger zones.

Mini buying guide:

If you need a **resistant, mobile, and compact barrier**, the **H972_03** is the ideal solution. Perfect for **companies, construction sites, parking lots, and industries**, thanks to its **painted steel structure, wheels with brakes, and folding design**, it offers **maximum safety and practicality**.

Easy to **transport and store**, this accordion barrier is an excellent choice for those who need **a temporary but stable and visible delimitation**.
