

Adjustable bed restraint belt h983_07

Restraint belt with a 14 cm high soft bodice and trident buckle closure. Allows prone or lateral decubitus with moderate trunk mobility. Waistband circumference: adjustable from 70 to 120 cm.

The **H983_07 restraint belt** is a **safety device** designed to ensure **controlled trunk containment**, allowing the patient to **maintain limited mobility** in a **prone or lateral** position. It is indicated for use in **hospitals, clinics and healthcare facilities**, ensuring **stability and comfort** during hospitalization.

Made of **100% cotton**, it features a **14 cm high soft bodice**, which offers a **comfortable and breathable fit**. The **trident buckle closure system** ensures a **secure and resistant closure**, while the **strap with eyelets** allows for stable attachment to the bed.

The **Nickel/Brass alloy adjustment eyelets** allow for **optimal adaptability**, adjusting the **waistband circumference from 70 to 120 cm** and ensuring **high versatility for different body types**.

To be used exclusively by **specialized healthcare personnel**.

For **advanced protection**, the **safety button and magnetic key** can be purchased **separately**, preventing unauthorized openings. The closure system can be **unlocked only with the dedicated magnetic key**.

Buy the **H983_07 restraint belt** now to ensure safety and stability in healthcare settings! Request a personalized quote today.
