

Adjustable gynecological chair h559_30

Multifunctional 3-section examination couch/chair with electrically adjustable height. Load capacity: 250 Kg.

Chair convertible into a couch for gynecological examinations suitable for offices, clinics, hospitals. Manufacturing material: square, rectangular and round **tubulars**, sturdy and safe. With a **minimal and innovative design**, the couch is **comfortable and easy to use**. The **support surface** is made with **high-density foam padding** and a **class 1 IM fire-retardant coated fabric upholstery**, washable and waterproof. The **leg supports are included**. The **structure is sectional** and the upper surface consists of 3 **electrically adjustable sections**. **All electrical parts comply with current regulations in the hospital field**. **Linear electric actuators**, distinguished by their thrust force, operate the backrest and leg section via a **hand control**, which activates the actuators, and a **foot control**, which adjusts the height of the structure. The backrest reaches an inclination of 80°. Two column actuators, through simultaneous movement and separate movement, allow for the adjustment of the structure's height and the Trendelenburg (-18°) and Anti-Trendelenburg (+18°) positions. There are **4 independent wheels with total brake**, with arched support. **Multifunctional stainless steel side rails included** with **supports** useful for resting two velcro-adjustable armrests. The **load capacity** of the gynecological chair is **250 kg**.

Technical characteristics:

- Total couch length: 1660 mm
- Couch depth: 680 mm
- Load capacity: 250 kg
- Weight: 70 kg
- Structure material: tubulars
- High-density foam padding
- Upholstery material: class 1 IM fire-retardant coated skai (imitation leather), washable with common detergents
- Sectional structure electrically adjustable via 4 electric actuators with hand and foot control
- Backrest inclination: 80°
- Adjustable height
- Trendelenburg position adjustment: -18°
- Anti-Trendelenburg position adjustment: +18°
- Thrust force of vertical electric columns: 2000N each
- Backrest thrust force: 5000N
- Leg section thrust force: 2000N
- Base with 4 independent wheels with total brake and arched support
- Multifunctional stainless steel side rails included
- Support for 2 armrests included
- 2 leg supports included

- Product subject to phospho-degreasing, rinsing and powder coating polymerized at 200°C with a minimum thickness of 70/80 microns
- Class 1 medical device compliant with the requirements of EEC Directive 93/42
- Available in different colors

**Images are purely indicative.*

INFORMATION

- **Length in millimeters** 1660.000000
- **Depth in millimeters** 680.000000
- **Height in millimeters** 1660.000000
- **type height** variable
- **capacity** 250 Kg
