

Adjustable half-moon modular table for schools h872_16

Half-moon modular table in 25 mm white melamine, height-adjustable up to 80 mm. Ideal for collaborative teaching and school safety. Dimensions: W. 90 x D. 75 x h. from 48 to 56 cm

The **half-moon modular table** is a furnishing solution designed specifically for modern educational dynamics and professional training environments. Its ergonomic configuration is conceived to facilitate visual interaction and cooperation among participants, overcoming the limits of traditional desks. Made with a **25 mm high-density chipboard top** and a **white melamine surface**, the table ensures an extremely durable work surface, scratch-resistant and easy to sanitize, responding to the needs of intensive daily use.

Technical features

- **Top material:** 25 mm thick chipboard with high-resistance white melamine surface finish.
- **Edges:** perimeter rounded in grey injected PVC, free of sharp edges for user safety.
- **Feet:** micrometric height adjustment system up to 80 mm for leveling on irregular floors.
- **Shape:** half-moon geometry designed for maximum modularity.
- **Dimensions:** W. 90 x D. 75 x h. from 48 to 56 cm
- **Intended use:** school classrooms, teaching laboratories, training centers, and collaborative environments.
