

Adjustable modular trapezoidal table for schools h872_18

Modular trapezoidal table in 25 mm melamine, 950x530 mm. Adjustable height 480-560 mm and PVC edges for flexible educational configurations.

The **trapezoidal modular table** represents a versatile and functional solution for furnishing modern classrooms and educational spaces. Thanks to its unique geometry, this piece of furniture allows for the creation of multiple configurations, facilitating the transition from frontal teaching to group workshops in just a few moments. The structure is designed to meet the ergonomic and resistance requirements typical of high-traffic environments.

Technical features

- **Tabletop material:** 25 mm thick chipboard panel with a white melamine surface coating, wear-resistant and easy to sanitize.
- **Edges:** Rounded profile in grey injected PVC for maximum user protection.
- **Adjustment:** Adjustable feet that allow height variation from 480 to 560 mm.
- **Dimensions:** Overall dimensions of 950 x 530 mm with a variable height between 480 and 560 mm.
- **Supply:** The product is delivered disassembled, accompanied by detailed instructions for quick and intuitive assembly.
