

Advertising barrier h140_338

Pedestrian barrier for urban furniture in **steel** with space for **advertising posters**.

Steel barrier for urban furniture with space for advertising. The structure is composed of a post and upper crossbeam in galvanized steel square tube, a post and internal frame in reduced-section square tube, a double-sided internal advertising panel in galvanized steel sheet, and a square-shaped connection plate in galvanized steel. The barrier is anchored to the ground by extending the posts into the subsoil. The base finish for the metal parts of this product is the "**gunmetal**" color, characterized by a dark gray hue with a metallic effect. The painting technique adopted for the galvanized steel structure is **thermosetting powder coating with oven baking**
