

Advertising totem with double-sided sign h738_202

Outdoor double-sided minitotem h738_202 with aluminum profiles and 10/10 sheet metal convex panels. Height 140 cm, silver metal base and pre-drilled for ground fixing.

The **advertising totem with double-sided sign h738_202** is a column display system designed for outdoor communication and high-profile directional signage. The structure is characterized by **extruded aluminum profiles** with a silver finish that frame convex display surfaces in **white pre-painted 10/10 sheet metal**. The curved shape of the panels not only improves the aesthetics of the support, but also increases structural rigidity and the readability of the message from different angles. Stability in outdoor contexts is ensured by a 6 mm thick circular metal base, silver powder-coated and equipped with holes for **mechanical ground fixing**. With a standard height of 1400 mm, this minitotem combines resistance and modern design for effective double-sided communication.

Technical features

- **Structure dimensions:** 1408 x 350 mm
- **Standard height:** 1400 mm
- **Sign format:** 300 x 1400 mm
- **Visible area:** 273 x 1400 mm
- **Profile material:** Extruded aluminum
