

Advertising totem with two uprights h738_210

Outdoor double-sided totem in aluminum and sheet metal with double silver upright, height 1400 mm and convex sign 420x1000 mm. Ideal for outdoor use.

The **advertising totem with two uprights** is a double-sided display system designed to offer high-impact and durable visual communication in outdoor environments. Thanks to the structure with **double anodized aluminum uprights** and the large-format sign, the product solves the need for stable self-standing signage, capable of resisting atmospheric agents without sacrificing an elegant and professional design. It is the ideal support for companies, public bodies, and points of sale requiring a vertical informative element visible from both directions of travel.
