

## Aerial maintenance basket h928\_01

Work basket for aerial maintenance. Dimensions: W. 800 x D. 800 x h. 1900 mm. Load capacity: 240 kg.

The **aerial maintenance work basket** represents a fundamental solution for those operating at heights, ensuring safety and efficiency during repairs and maintenance operations. **Designed for use with forklifts**, this robust basket, also known as a work platform or personnel basket, is the ideal ally for interventions on buildings, machinery, ceiling lighting systems and inventory activities. Made of **high-quality steel**, the basket is characterized by a **robust and durable structure**, capable of withstanding the most demanding working conditions. The work platform, equipped with a **non-slip surface**, ensures secure adhesion even in slippery environments, minimizing the risk of accidents. Every aspect of the design **complies with accident prevention regulations (UVV)**, and the basket has been **tested and certified by TÜV**, confirming its high safety standard. Safety is further guaranteed by a **chain lock** that prevents accidental movement of the basket, preventing it from slipping off the forklift forks and ensuring a stable position during use. With a **weight** of approximately **70 kg**, the basket is relatively light, which facilitates transport and maneuvering, even without the support of a forklift. **Produced in compliance with the BGVD 27 regulation** for industrial trucks, this basket not only offers excellent safety, but is also **available in various RAL colors**, allowing for customization that adapts to the work environment. Thanks to its versatility and its design conceived for maximum safety, the aerial maintenance work basket is an excellent choice for ensuring high-altitude operations without compromising protection and reliability.

### Technical features:

- Dimensions: W. 800 x D. 800 x h. 1900 mm
- Maximum load: 240 kg
- weight: 70 kg
- Material: steel
- Non-slip work surface
- Chain lock

- Tool tray
- Available in various RAL colors
- TÜV certification
- Compliant with the respective UVV accident prevention regulations
- Produced in compliance with the BGVD 27 regulation
