

Aerial maintenance cage h928_03

Aerial maintenance cage for industrial furniture. Maximum load: 300 kg. Dimensions: W. 800 x D. 1200 x h. 1910 mm.

The **aerial maintenance cage** is an indispensable tool in the industrial sector for safely performing repair and maintenance work on high parts of buildings, machinery, ceiling lighting systems and inventory management. Designed to guarantee maximum safety, it **complies** with strict accident prevention regulations (**UVV**), thus offering a protected and reliable working environment for operators. The work platform is built with a **robust steel structure**, which ensures strength and durability over time. The **work surface** is **non-slip**, allowing for safe operation even at high heights. The stability of the platform is further guaranteed by a **locking pin**, which prevents any unwanted movement, keeping it firmly anchored to the forklift forks. One of the distinctive features of the cage is the presence of a **practical standard tool tray**. This tray facilitates the organization and accessibility of the tools necessary for maintenance operations, increasing work efficiency. Particularly suitable for use with reach trucks, optimizing maneuvering space in narrow and congested environments. With a **maximum load capacity of 300 kg**, it can support both the operator and the tools and materials necessary for the work, making it a versatile and reliable solution for a wide range of industrial applications. The combination of safety, functionality and adaptability makes the aerial maintenance cage an excellent choice for aerial maintenance operations in any industrial context.

Technical characteristics:

- Dimensions: W. 800 x D. 1200 x h. 1910 mm
- Maximum load: 300 kg
- Weight: 125 kg
- Construction material: steel
- Non-slip work surface
- Locking pin
- Available in different RAL colors
- TÜV certification
- Compliant with the respective UVV accident prevention regulations
- Produced in accordance with the BGVD 27 regulation
