

Airtight road manhole cover C250 h638_74

Square cast iron manhole cover with automatic closure. Dimensions: W.800xD.800x H.55mm

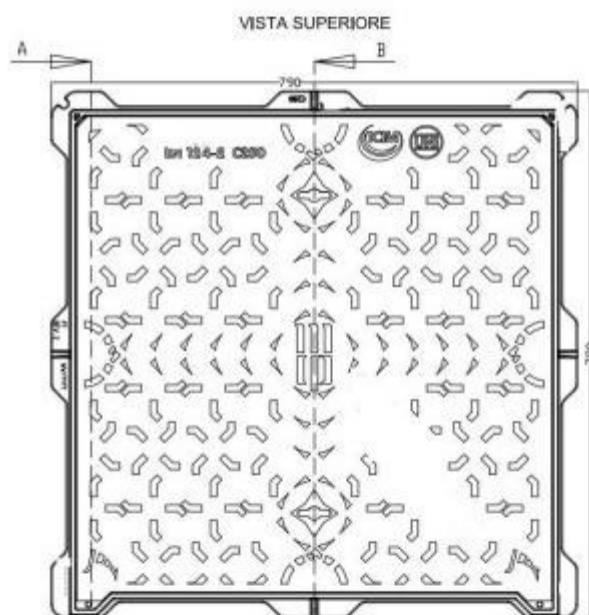

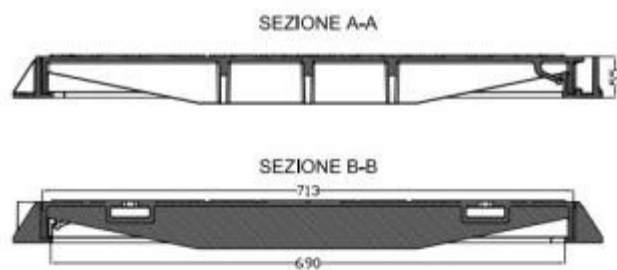

Airtight ductile iron manhole cover and with **automatic closure** and **clear opening** 700x700. The load class of this road manhole cover is **C250**, it is therefore suitable for roads subject to the passage of **cars and buses**. It has a **square-shaped frame at the support base**, with an equally square cover that corresponds to road level. The corners of the frame **are shaped and rounded** to ensure a greater support base and secure anchoring; the frame is also equipped with **reinforcing ribs and lugs** shaped on the inner edge for locking the cover and an internal "U" seat to ensure greater **odor tightness**. The cover is provided according to the standard with identification markings and **specific anti-slip reliefs** for water drainage.

Technical features:

- Material: cast iron - GJS-500-7 – EN 1563
- Dimensions: 800 x 800 mm
- Height: 60 mm
- Square frame
- Square cover
- Clear opening: 700 x 700 mm
- Total weight: 52.80 kg
- Load class: C250 – ISO 9001:2015 certified
- Airtight
- With automatic closure
