

AISI 304 stainless steel storage trolley h750_08

AISI 304 stainless steel trolley for storage and transport of cured meats and cheeses. Dimensions 1450×650×1900 mm. Non-magnetic and antibacterial.

Professional trolley designed specifically for the storage and transport of cured meats and cheeses in controlled food environments. Made of **AISI 304 stainless steel**, it guarantees high performance in contexts where hygiene, corrosion resistance, and durability are non-negotiable requirements.

AISI 304 stainless steel is the reference material in professional catering and food processing thanks to its **non-magnetic, rustproof, and antibacterial** properties. This composition allows for deep cleaning without risks of biological contamination and ensures a long service life even in humid and corrosive environments.

Technical features

- Material: AISI 304 stainless steel
- Length: 1450 mm
- Depth: 650 mm
- Height: 1900 mm
- Resistant and robust structure
- Non-magnetic properties
- Antibacterial properties
- Rustproof
