

## Aluminium suspension bridge for playground h575\_44

Aluminium moving bridge for play areas. 90x90 mm structure, 70x70 mm oscillating elements, galvanized steel chains. Age range 5-11 years, max 3+ users.

The aluminium moving bridge is a structure dedicated to the furnishing of urban areas and green spaces, specifically designed for the fun and motor development of children between 5 and 11 years old. It guarantees **stability and safety** during use, combining a robust construction with protective details.

The **load-bearing structure** is made with aluminium posts with a section of 90 x 90 mm with rounded corners, which reduce the risk of accidental impact. The **oscillating elements** consist of 70 x 70 mm aluminium posts, allowing for controlled movement. The **chains are made of galvanized steel**, a material resistant to corrosion and durable over time.

## Technical features

- Material: aluminium
- Rounded corners for safety
- Load-bearing post section: 90 x 90 mm
- Oscillating element section: 70 x 70 mm
- Chains: galvanized steel
- Age range: 5-11 years
- Maximum number of users: 3+
- Recommended safety surfacing: 26 sqm
- Safety area: 647 x 400 cm
- Maximum fall height:

## INFORMATION

- Length in millimeters 3470.000000
