

Aluminum coffin trolley h687_92

Motorized funeral trolley h687_92 in aluminum. Includes 18V battery, charger and remote control for electronic lifting. Load capacity 300 kg.

The **h687_92 coffin trolley** represents the technological evolution in funeral handling support, integrating a **motorized lifting system** powered by battery. The **aluminum** structure ensures an extremely low weight of only 12 kg, making the device easy to handle and easy to fold for storage. Electronic management via microprocessor ensures a constant and safe lifting speed, ideal for the precise alignment of the coffin with the hearse or the dressing table. This system solves the problem of physical strain for the operator, also allowing the inclination of the body to be adjusted during display. The kit includes an **18V lithium-ion battery** and a remote control with extensible cable for immediate control of operations.

Technical features

- **Open dimensions:** 135.5 x 55 x 61.1 cm
- **Folded dimensions:** 80 x 29 x 55 cm
- **Load capacity:** 300 kg
- **Frame weight:** 12 kg
- **Materials:** Aluminum and stainless steel joints
- **Power supply:** 2 Ah – 18V Li-Ion battery (included)
- **Piston stroke:** 20 cm (height above roller 62–82 cm)
- **Wheels:** Diameter 20 cm (Ø 200 mm)
- **Safety:** 4 independent brakes
- **Colors:** available in silver, bronze and black
- **Control:** Remote control with extensible cable

Equipment included

- **Battery:** 2 Ah – 18V Li-Ion
- **Charger:** dedicated
- **Remote control:** with cable for height adjustment
- **Remote control holder:** integrated on the frame

** Image purely indicative*

** Upon request and subject to quotation, it is possible to have the kit for drape attachment*

INFORMATION

- **Capacity** 300 Kg
