

Aluminum telescopic ladder h853_08

Professional aluminum telescopic ladder, 4+4 step configuration, 150 kg capacity. Compact when closed (1.29 mt) for maximum portability.

This **professional telescopic ladder** is designed to offer maximum versatility and safety in dynamic operating contexts. The **aluminum** structure ensures an excellent ratio between mechanical resistance and lightness, facilitating manual movement and storage in small spaces. The telescopic configuration allows height adjustment based on the operator's specific needs, solving the space problems typical of traditional extension ladders.

Technical features

- **Structure material:** high-strength aluminum
- **Protection components:** polypropylene step covers and non-slip feet
- **Articulation system:** high-strength steel hinge
- **Safety mechanisms:** equipped with release knob, step lock and hinge lock system
- **Configuration:** 4+4 steps
- **Load capacity:** maximum load 150 kg
- **Logistic footprint:** closed dimension 1.29 mt
