

Aluminum telescopic ladder h858_06

Professional anodized aluminum telescopic ladder, height 4.4m, 2x7 non-slip rungs. Compact and safe with 150kg load capacity.

This **professional telescopic ladder** is designed to meet the needs of operators who require a versatile, robust, and easily transportable tool. The **anodized aluminum** structure not only provides lightness and mechanical strength, but also prevents surface oxidation, ensuring clean handling during intensive use. Thanks to its compact design, it effectively solves critical issues related to storage and transport in small vehicles, without sacrificing a significant operating height for maintenance and installation tasks.

Technical features

- **Material:** corrosion-resistant anodized aluminum
- **Rungs:** 2 x 7 with special ribbed non-slip surface
- **Maximum load capacity:** 150 kg
- **Safety:** integrated locking mechanism for each section
- **Closed dimensions:** 87 x 48 x 19 cm
- **Maximum extended height:** 4.4 m
