

Animal examination table h938_12

Stainless steel animal examination table with waterproof top, detachable with feet. Dimensions: W 140 x D 70 x H 85 cm.

The **animal examination table H938_12** is an optimal choice for veterinary clinics and hospitals looking for reliability, robustness, and ease of use. Entirely constructed of **stainless steel**, this table offers excellent resistance to corrosion and chemical agents, making it perfect for use in hospital environments where hygiene and sterility are absolute priorities. Stainless steel is known for its durability over time and requires minimal maintenance, maintaining its properties even under intensive use conditions.

The **phenolic worktop** guarantees high **water resistance**, preventing damage due to accidentally spilled liquids or constant contact with chemical products used during veterinary procedures. This makes it ideal for situations where frequent cleaning and disinfection interventions are necessary, such as during visits or operations on animals.

One of the main advantages of this table is its **detachable structure**, which allows for easy transport and assembly. It is particularly suitable for facilities that need flexible furniture or want a mobile table for temporary movements. The **design with feet** offers an additional advantage: the table can be positioned safely and stably on any surface, even on slightly uneven floors, without risking wobbling or instability during use.

The generous dimensions of **140 x 70 cm** offer a wide and comfortable work surface, suitable for examining animals of all sizes, while the height of **85 cm** is designed to ensure optimal ergonomics, reducing the physical strain on veterinary staff during prolonged use. This table is designed to facilitate the daily work of professionals, ensuring not only long life but also efficient and safe operation.

Improve your veterinary practice with the **animal examination table H938_12**, designed to offer maximum strength, stability, and practicality. Thanks to its stainless steel structure and waterproof top, it will guarantee a durable and easy-to-maintain product.

Technical features:

- **Frame material:** Stainless steel
- **Top material:** Water-resistant phenolic
- **Dimensions:** 140 x 70 x 85 cm
- **Adjustable feet:** For optimal stability
- **Detachable product:** Easy to transport and assemble
- **Use:** Veterinary examinations in hospital contexts

User benefits:

- Ease of cleaning and resistance to liquids and chemicals
- Robust stainless steel construction for durability and hygiene
- Adjustable feet to adapt to uneven surfaces
- Detachable for easy transport and fast assembly
- Waterproof surface that reduces the risk of damage and facilitates maintenance

FAQ:

1. Is the table easy to clean?

Yes, the phenolic worktop is water-resistant, making cleaning and sanitization simple.

2. **Can I assemble the table myself?**

Certainly, the table is detachable and assembly is simple and quick.

3. **Is the table stable on uneven surfaces?**

Yes, thanks to the adjustable feet, the table guarantees stability even on floors that are not perfectly level.

4. **What are the dimensions of the table?**

The table measures 140 cm in length, 70 cm in depth, and 85 cm in height.

Mini buying guide:

When choosing an **animal examination table**, there are some fundamental characteristics you must consider to ensure an informed and lasting purchase. Opting for a **stainless steel** table is essential in clinical environments. This material not only resists corrosion, but is also easy to sanitize, reducing the risk of cross-contamination between patients.

It is particularly useful in veterinary hospital contexts where hygiene is critical. The worktop of the table must be made of **water-resistant phenolic** material, to prevent liquids from damaging the structure and ensure quick and easy cleaning. This is important to prevent the proliferation of bacteria or fungi, ensuring a sterile environment during visits. If you need to move the table frequently or want an easily transportable solution, choose a **detachable model**.

This will allow you to easily adapt your facility to different needs, also facilitating transport in case of relocations or space reorganizations. A table with **adjustable feet** is indispensable in situations where the floor surface might not be perfectly level. The feet allow you to adjust the height and stability of the table, avoiding unwanted wobbling or movement during veterinary operations. The dimensions of the table are crucial. The **H938_12** model with 140 x 70 cm offers a large work space for animals of different sizes, while the height of **85 cm** is designed to improve ergonomics, reducing physical effort for staff during visits. If you want to work efficiently and comfortably, a table with these characteristics is the ideal choice.
