

Animal recovery cage h938_04

Single stainless steel cage H938_04 for veterinary clinics. Dimensions 61x72x60 cm, removable dividers, thermal and acoustic insulation. Resistant and hygienic material.

The **single stainless steel cage H938_04** is a solution dedicated to the safe and comfortable recovery of animals in veterinary clinics and surgeries. Made entirely of **stainless steel**, it offers extraordinary corrosion resistance and durability even in intensive use environments. This material ensures ease of cleaning and impeccable hygiene, fundamental in every veterinary facility.

The cage is equipped with **removable dividers** that adapt the internal space according to the size and needs of the animals, ensuring operational flexibility. The **thermal and acoustic insulation** protects animals from external noise and maintains a comfortable temperature, reducing stress and improving well-being during recovery.

The **compact dimensions** combined with structural solidity make it ideal for outpatient spaces and veterinary clinics, without compromising on animal comfort.
