

Animal transport stretcher with adjustable height h930_55

Veterinary trolley with adjustable height, non-slip surface and braking wheels. Dimensions: W 160 x D 80 x H from 47 to 88 cm.

The **H930_55 stretcher** is designed to meet the operational needs of **veterinary clinics, surgeries and recovery centers**. Its **adjustable height from 47 to 88 cm** via a **hydraulic system** allows for **easy positioning of even large animals**, minimizing the operator's physical effort.

The structure rests on **four 12.5 cm swivel wheels** with **integrated brakes**, which guarantee **smooth maneuverability even over long distances**. The **160 x 70 cm work surface** is covered with **non-slip rubberized material**, fireproof and waterproof, designed to offer **maximum safety and hygiene**, even in intensive use conditions.

The **powder-coated steel frame** provides robustness and resistance to wear, maintaining a professional aesthetic over time. As standard equipment, an **IV pole with two hooks** is also included, useful for assisted interventions or treatments.

Order the **H930_55 stretcher** now for a complete, ergonomic and safe solution for animal handling. Contact us for multiple supplies.

Technical features:

- **Frame:** Powder-coated steel
- **Surface:** Rubberized, non-slip, fireproof, liquid-resistant
- **Height adjustment:** Hydraulic, from 47 to 88 cm
- **Work surface:** 160 x 70 cm
- **Dimensions:** W 160 x D 80 x H from 47 to 88 cm
- **Wheels:** 4 swivel wheels Ø 12.5 cm with brakes
- **Weight:** 60 kg
- **Maximum supported load:** 250 kg
- **Included equipment:** Non-slip mat + IV pole with 2 hooks

Benefits for the user:

- **Hydraulic adjustment:** to work ergonomically.
- **Easier access:** for animals of all sizes.
- **Maximum:** stability and safety, thanks to the non-slip mat and wheels with brakes.
- **Resistant:** to wear, ideal for intensive use environments.
- **Equipment:** complete for immediate clinical management.

FAQ:

1. **Is the stretcher suitable for transporting large animals?**
Yes, it has a maximum capacity of 250 kg and is designed for heavy loads.
2. **Is the surface washable and safe?**
Yes, the coating is fireproof, non-slip and liquid-resistant, therefore hygienic and durable.
3. **Are the wheels equipped with brakes?**
Yes, the 4 x 12.5 cm wheels are swivel and equipped with brakes, for stability and safety.
4. **Is it possible to adjust the height practically?**
Yes, via side levers that activate the hydraulic system, adjustment is smooth and precise.
5. **What does the supply include?**
In addition to the structure, the equipment includes a non-slip mat and an IV pole with two hooks.

Mini purchase guide:

The choice of an adjustable stretcher is strategic for improving clinical efficiency and animal welfare.

The H930_55 model is ideal for **veterinary clinics and care centers** looking for **mobility, robustness and safety** in a single tool.

Thanks to the **hydraulic system**, the height adapts to every need, while the **rubberized surface and professional wheels** make this stretcher **versatile and safe** even in the most dynamic contexts.

Veterinary stretcher with adjustable height, professional veterinary trolley, hydraulic stretcher for animals, non-slip stretcher with IV pole, stretcher for veterinary clinics heavy loads.
