

Ankle immobilization belt h239_59

Pair of padded polyester ankle straps with magnetic key closure for stretcher immobilization.

The **H239_59 immobilization ankle straps** are designed for the **patient's safe immobilization on the stretcher**, preventing dangerous movements and involuntary manipulation by the patient themselves or unauthorized persons.

The product consists of a **pair of ankle straps** in **coated polyester with internal padding**, designed to **prevent injuries from compression or chafing** during restraint.

The **magnetic closure system with key** guarantees high safety in use, avoiding accidental opening and offering **total control to the healthcare operator**. Thanks to the **quick adjustment and fastening system**, the ankle straps easily adapt to different morphologies and various stretcher models.

The belt is indicated for use in **hospital, emergency, or ambulance settings**, where it is necessary to ensure the stability of the patient during transport.

FAQ:

1. **Can the ankle straps be used on any stretcher?**
Yes, thanks to the adjustable system, they adapt to most models.
2. **Is it possible for the patient to open them alone?**
No, the magnetic closure requires the use of a specific key.
3. **Are the ankle straps reusable?**
Single-user use is recommended to ensure hygiene.
4. **How are the ankle straps cleaned?**
Washable up to 60°C. Do not iron, do not tumble dry or bleach.
5. **Are they also suitable for ambulance transport?**
Yes, they are ideal for use on stretchers in hospital and emergency settings.

Mini buying guide:

When choosing a restraint system for patients on stretchers, it is essential to ensure that the product is **safe, easy to apply and comfortable for the patient**.

The H239_59 ankle straps offer a **magnetic closure with key**, to prevent unwanted opening, and a **padded structure** to avoid pressure trauma.

The **simple adjustment** facilitates its use even in emergency situations, making them ideal for medical transport.
