

Anthracite grey bus waiting shelter h1023_03

Hot-dip galvanized steel shelter with trapezoidal metal sheet roof RAL 7016. Dimensions: W 216.5 x D 216.5 x H 251 cm.

The **H1023_03 bus waiting shelter** is a robust, elegant structure designed to guarantee **protection and comfort** for public transport users. Built with high-quality materials and modern finishes, it represents an **ideal solution for urban furniture**, capable of withstanding environmental stresses and integrating harmoniously into any city context.

Made of **hot-dip galvanized steel**, the shelter offers **high resistance to corrosion**, durability over time, and **zero maintenance**. The roof is made of **waterproof trapezoidal metal sheet**, designed to withstand difficult weather conditions, with a sober and professional aesthetic thanks to the **anthracite grey RAL 7016 finish**. Water drainage occurs through **gutters** at ground level.

The modular design of the H1023_03 model stands out for its **versatility and flexibility**, and it is equipped with **certified statics** to resist **wind and snow loads up to 1.5 kN/m²**, without additional costs for structural calculations. The generous dimensions – **clear width 2045 mm, clear height 2360 mm, useful depth 2105 mm** – guarantee a **comfortable and accessible space** for multiple people, including those with specific mobility needs.

The **useful surface area of 4.3 m²** allows for protected waiting even during prolonged stays, while the **floor mounting** ensures a **stable and rapid installation**. Ideal for public entities, municipalities, transport companies, or private operators in the urban furniture sector.

- **Shelter:** effective against atmospheric agents in every season.
- **Materials:** durable and corrosion-resistant.

- **Accessibility:** total for every type of user.
- **Design:** elegant and easily integrated into urban environments.
- **Installation:** simple with statics already included.

FAQ:

1. **Is the shelter certified for zones subject to snow or strong wind?**
Yes, it is certified for snow loads up to 1.5 kN/m² and designed to withstand strong gusts of wind.
2. **What is the finish of the roof?**
The roof is made of waterproof trapezoidal metal sheet, painted RAL 7016 – anthracite grey.
3. **Is it possible to customize it based on the urban context?**
Yes, the system is modular and flexible, and can be adapted to tailor-made projects.
4. **Is assembly included in the supply?**
No, assembly is the customer's responsibility, but the structure is designed for floor mounting.
5. **Are static certifications included?**
Yes, static verifications are already included at no additional cost.

Mini buying guide:

When choosing a **bus stop shelter**, it is essential to ensure that the structure offers **complete protection**, complies with **wind and snow load** regulations, and features **certified materials** for outdoor use.

Galvanized steel represents the ideal choice to guarantee **resistance and long life**, while a waterproof trapezoidal sheet roof effectively protects against rain and snow.

The **generous dimensions and clear height of over 2.3 meters** ensure comfort for all users, including those with disabilities.

Finally, a structure with **certified statics** allows for fast and compliant installation without having to resort to further technical calculations.
