

Anthropometric desk h908_10

Ergonomic desk for people with disabilities with a metal structure, 80x60 cm, micrometric hand crank adjustment, and tilted top for school inclusion.

The **disability desk** represents an essential solution to ensure inclusivity and ergonomics within school and training environments. Designed to meet the specific postural needs of students with motor disabilities, this support allows for complete customization of the study station. The structure allows for easy wheelchair access, while the integrated adjustment systems solve the problem of physical barriers between the student and the work surface.

Technical features

- **Elevation system:** Micrometric height adjustment via manual hand crank.
- **Worktop:** Adjustable tilt surface to optimize reading and writing.
- **Dimensions:** W 80 x D 60 cm.
- **Height range:** Adjustable from 57 to 81 cm.
- **Ergonomic compatibility:** Compliant with standard school sizes 3-4-5-6-7.
- **Structure:** Reinforced frame designed to ensure stability even at maximum extension.
