

Anthropometric table for the disabled h908_147

Aluminum anthropometric table for the disabled, 80x60 cm top adjustable in height and tilt for school inclusion and rehabilitation. The **H908_147 anthropometric table** represents an advanced technical solution for the removal of architectural barriers in educational, healthcare, and domestic contexts. Designed specifically for users with **motor disabilities**, this support resolves the critical issues related to the accessibility of standard workstations, allowing for an optimal wheelchair approach. The double mechanical adjustment promotes the maintenance of a correct ergonomic posture, preventing muscle fatigue and promoting autonomy in daily study or work activities.

Technical features

- **Type:** Multifunctional anthropometric table
- **Height range:** Adjustable from 57 to 81 cm for universal adaptation
- **Worktop:** Tilting surface with variable inclination system
- **Dimensions:** W 80 x D 60 cm, optimized for space and operation
- **Structure:** High-resistance aluminum supporting frame
- **Coloring:** Top in ivory finish, structure in aluminum shade
- **Stability:** Reinforced base to prevent oscillations during intensive use
