

Anti-decubitus kit with compressor and air mattress h30905

Anti-decubitus mattress with inflatable elements with the possibility of adjusting the pressure according to the patient's weight. Material: nylon+PU. Dimensions: 200x90xh.11.5 cm.

Anti-decubitus air mattress **ideal for the disabled and elderly** confined to home care and long-term home therapies. The air mattress is composed of **inflatable nylon elements** fixed by means of buttons that are easily interchangeable in case of breakage and washable. The alternation of contact points with the skin performs a gentle massage that **allows good tissue oxygenation** preventing the formation of pressure sores and ulcers. The special compressor, particularly silent and vibration-free, allows an **optimal regulation and setting of the pressure** via the knob on the front of the device; alternately inflating and deflating the elements of which the mattress is composed.

Technical characteristics:

- 18 nylon elements (medical grade) diam. 12 cm
- PU cover
- Possibility of adjusting the pressure
- Equipped with two hooks for hanging the compressor at the end of the bed
- Dimensions: 200 x 90 x h.11.5 cm
- Capacity: 150 Kg
- Weight: 6 Kg
- CE compliant
- Requirements according to standard EN 12182 - CEI UNI EN 60601-2-52

Compressor technical data:

- Power supply: 220 V AC
- Power: 10 VA
- Noise level:
- Insulation: Class II type B
- Operating temperature: from 10° to 40°
- Frequency: 50/60 Hz
- Flow: 4l/min
- Fuse: nr. 2 RF model diam. 5x20 1.5 A
- Pressure range: > 12KPa (90mmHg)
- Operating humidity: from 30% to 75%

INFORMATION

- **warranty** 1 anno
- **Depth** 11,5 cm
- **Width** 90 cm
- **length** 200 cm
- **Type** air
