

Anti-decubitus kit with digital compressor and h230_133 mattress

Professional anti-decubitus kit in medical-grade PVC, 88x200x20 cm, with 18 interchangeable elements and CPR valve for managing high-risk patients.

The **h230_133 anti-decubitus kit** is an advanced system designed for the **prevention of pressure sores** in patients classified as high risk. Developed for professional settings such as hospitals, nursing homes, and long-term care wards, the device meets the need for optimal body pressure distribution, ensuring skin protection and postural stability during prolonged bed rest.

The mattress is constructed with **18 interchangeable elements** in medical-grade PVC, completed by a **waterproof nylon/PVC cover** that is wear-resistant and facilitates sanitization operations. Clinical safety is supported by the **CPR valve**, essential for rapid deflation in case of emergency maneuvers. The digital compressor manages a 14-minute alternating cycle, integrating **Static and Seat Inflating** functions for dynamic adaptation to the user's posture.

Technical features

- **Mattress material:** Medical-grade PVC with waterproof nylon/PVC cover
- **Configuration:** 18 interchangeable elements with anchoring flaps
- **Emergency devices:** CPR valve for rapid deflation
- **Inflated mattress dimensions:** 88 × 200 × 20 cm (excluding terminal flaps)
- **Total weight:** 9.5 kg (mattress) + 1.5 kg (compressor)
- **Maximum capacity:** 180 kg
- **Compressor alternating cycle:** 14 minutes
- **Air flow:** 7 liters per minute
- **Pressure range:** Adjustable between 14 mmHg and 62 mmHg
- **Special functions:** Static and Seat Inflating system for postural support
- **Power supply:** 180 cm cable
- **Prevention class:** High risk
