

Anti-decubitus kit with XXL air mattress and compressor h30907

Extra large anti-decubitus air mattress equipped with compressor with regulator. Dimensions: 200x120x12 cm. Maximum capacity: 200 Kg.

Air mattress ideal for preventing pressure sores and ensuring good tissue oxygenation. Anti-decubitus mattress with transverse elements, particularly suitable **for supporting weights up to 200 Kg.** Extra large mattress in nylon and PVC with separate chambers consisting of 18 tubular elements arranged along the entire surface of use and alternately inflated with cycles of approximately 10-12 min. The air compressor, particularly silent, **allows easy pressure adjustment** by means of a knob on the front of the device; alternately inflating and deflating the elements of which the mattress is composed. The tubular elements, fixed by practical buttons, are **easily washable and interchangeable.**

Mattress technical features:

- Material: medical grade nylon/PVC
- Type: air with transverse elements Ø 12 cm
- Dimensions: 200x120x12 cm
- Maximum capacity: 200 Kg
- Weight: 6 Kg
- Compliant: CE

Compressor technical features:

- Power supply: 220 V AC
- Power: 10 VA
- Noise level: 24 db
- Insulation: Class II type B
- Operating temperature: from 10° to 40°
- Frequency: 50/60 Hz
- Flow: 4L/min
- Fuse: nr. 2 model RF Ø 5x20 1.5A
- Pressure range: >12KPa (90mmHg)
- Operating humidity: from 30% to 75%

All materials used for the construction of the aid are hypoallergenic and non-toxic.
