

Anti-decubitus mattress and compressor kit h983_11

Medical PVC anti-decubitus bubble kit for low-risk patients. Dimensions 199x88x8 cm with a 12-minute alternating cycle compressor.

The **anti-decubitus kit h983_11** is a medical device designed specifically for the **prevention of pressure sores** in patients confined to bed for long periods and classified as **low risk**. The system operates through alternating bubble technology that allows the contact points with the body to vary, actively promoting **blood circulation** and reducing prolonged pressure on skin tissues.

The set consists of a high-quality **inflatable medical PVC mattress overlay** and a **silent electric compressor**. The latter manages the pressure alternation within the cells with a cycle of approximately **12 minutes**, ensuring effective automated pressure relief. The mattress structure includes **long tuck-in flaps** for optimal stability on the bed and a **double tube** for a secure connection to the compressor.

Technical characteristics

Compressor Specifications:

- **Shell material:** resistant ABS
- **Operating pressure:** adjustable from 70 to 120 mmHg
- **Inflation cycle:** approx. 12 minutes
- **Air delivery:** 5-6 liters per minute
- **Electrical protection:** internal fuse F 500mA, 250 V
- **Power supply:** 220-230V AC, 50 Hz
- **Power consumption:** 7 W (Class II)
- **Dimensions:** 230 x 120 x 100 mm
- **Weight:** 1.2 kg

Mattress Specifications:

- **Type:** bubble overlay with tuck-in flaps
- **Material:** medical PVC compliant with CE regulations
- **PVC thickness:** between 25 and 35 microns
- **Dimensions (inflated):** 199 x 88 x 8 cm
- **Flap length:** approx. 40 cm per side
- **Maximum load capacity:** 100 kg
- **Net weight:** 2.35 kg
- **Color:** Beige

Accessories included:

- Emergency repair kit
- Double connection tube
- User manual
