

Anti-decubitus mattress for hospitals h582_134

Anti-decubitus mattress in polyurethane foam. Dimensions: L.190 x W.85 x h.14 cm. Fireproof class 1IM.

Anti-decubitus mattress ideal for use on hospital beds within clinics and hospitals. Designed to promote protection from pressure sores in patients forced into long-term stays. Made of **conventional open-cell polyurethane foam** and produced **without C.F.C. and without latex**. Made of **class 1IM fireproof material**, with low smoke toxicity, which makes it compliant with specific regulations. **Truncated pyramidal processing, density 30 Kg/m3**. Subjected to specific treatments to prevent the formation of mites, mold, microbes and ensure adequate protection against odors.

Technical features:

- Dimensions: L.190 x W.85 x h.14 cm
- Weight: 5.8 kg
- Max capacity: 150 kg
- Material: polyurethane foam
- Single section
- Truncated pyramidal, density 30 Kg/m3
- Unlined
- C.F.C. free
- Latex free
- Approved and compliant with UNI 9175 and UNI 9175/FA1 standards
- Fire reaction class 1 IM
- Compliant with optical density control and smoke analysis standard: AIRBUS ATS 1000.001
- Antimicrobial, antibacterial, anti-mite, anti-mold treatment

INFORMATION

- **Width** 85 cm
- **length** 190 cm
- **Type** in poliuretano espanso

Anti-decubitus mattress for hospitals h582_134

Width: 85 cm

Length: 190 cm

Typology: in poliuretano espanso
