

Anti-decubitus mattress with foam base h230_113

Anti-decubitus mattress in siliconized hollow fiber with foam base

Anti-decubitus mattress consisting of a **shaped polyurethane foam base**, on which **14 TNT cylinders** containing siliconized hollow fiber rest. The mattress is equipped with a washable **100% cotton** cover with a zipper. Each cylinder acts independently of the others and on a limited area, allowing the fiber to express its potential to the maximum. The structure of the fiber allows air passage and therefore excellent skin transpiration. Indications: prevention of pressure sores in heavy patients.

Technical characteristics:

- 14 TNT cylinders with siliconized hollow fiber
- 100% cotton cover with zipper
- Dimensions: cm. 195x85xh.16 cm
- Maximum supported weight: kg. 120
