

Anti-fatigue anti-slip mat 90×150 cm h1043_37

Industrial comfort foam anti-fatigue mat with black diamond surface and yellow safety edges, mm 900x1500x14. Self-extinguishing, resistant to oils and fats.

The **anti-fatigue anti-slip mat 90×150 cm** (model h1043_37) is a high-performance safety and comfort device, specifically engineered for the most demanding industrial uses. Developed for **mechanical workshops, factories, assembly departments, logistics warehouses and automated production lines**, this mat is aimed at health and safety managers (RSPP) who need to optimize the ergonomics of static workstations. The system solves the operational problem of **musculoskeletal disorders from prolonged standing and the risk of slipping** on industrial floors, offering a special internal foam structure to ensure greater relief for feet and joints. The mat features a high-resistance walkable surface with a diamond pattern and is equipped with light resistance to contact with industrial oils and fats. The high-visibility aesthetic configuration features a black central body bordered by yellow safety ramp edges, with an upper part having self-extinguishing properties.

Technical features

- **Geometric dimensions (WxDxH):** 90 x 150 x 1.4 cm (mm 900 x 1500 x 14)
- **Type of walkable texture:** diamond design for optimal grip
- **Aesthetic configuration and colors:** black central body with high-visibility yellow perimeter edges
- **Internal comfort structure:** integrated foam for shock absorption and greater muscular relief
- **Upper layer properties:** high-resistance surface with self-extinguishing properties
- **Specific chemical resistance:** light resistance to industrial oils and fats
- **Performance index - Anti-fatigue level:** category 4 (excellent comfort for intensive shifts)
- **Performance index - Anti-slip level:** category 3 (stable anti-slip properties)
- **Performance index - Wear and durability level:** category 4 (suitable for heavy industrial use)
- **Accident prevention devices:** supplied complete with beveled anti-trip ramp edges
- **Suitability for use:** suitable for the most severe working conditions in factory and logistics environments
