

Anti-fatigue anti-slip mat 90×600 cm h1043_39

Industrial anti-fatigue mat in comfort foam with black diamond pattern surface and yellow safety borders, mm 900x6000x14. Self-extinguishing, extra length of 6 meters.

The **anti-fatigue anti-slip mat 90×600 cm** (model h1043_39) is a high-performance safety and comfort device in an extra-long runner format, specifically engineered for the most demanding industrial uses. Developed for **extended assembly lines, multiple serial packing benches, automated packaging plants, and logistics processing corridors**, this 6-meter-long mat is aimed at health and safety managers (RSPP) who need to optimize ergonomics over large operational spans without interruptions. The system solves the operational problem of **musculoskeletal disorders from prolonged standing and the risk of slipping** along continuous production flows, offering a special internal foam structure to ensure greater relief for feet and joints during side-to-side walking. The mat features a high-resistance walkable surface with a diamond pattern and is equipped with light resistance to contact with industrial oils and greases. The high-visibility aesthetic configuration features a black central body delimited by yellow safety ramp edges, with a top part having self-extinguishing properties.

Technical features

- **Geometric dimensions (LxWxH):** 90 x 600 x 1.4 cm (mm 900 x 6000 x 14)
- **Longitudinal development:** 6-meter extra-long runner format for continuous production lines
- **Walking texture type:** diamond design for optimal grip and anti-slip
- **Aesthetic configuration and colors:** black central body with high-visibility yellow perimeter edges
- **Comfort internal structure:** integrated foam for shock absorption and greater muscle relief
- **Top layer properties:** high-resistance surface with self-extinguishing properties
- **Specific chemical resistance:** light resistance to industrial oils and greases
- **Performance index - Anti-fatigue level:** category 4 (excellent comfort for intensive shifts)
- **Performance index - Anti-slip level:** category 3 (stable anti-slip properties)
- **Performance index - Wear and durability level:** category 4 (suitable for heavy industrial use)
- **Accident prevention devices:** supplied complete with anti-trip beveled ramp edges
- **Suitability for use:** suitable for the most severe working conditions in factory, manufacturing, and logistics environments

** Images purely indicative*

INFORMATION

- **Thickness** 14 mm

- Carpet type Pieno
