

Anti-shock tile for gyms h620_12

Safety flooring for sports centers. Material: recycled rubber. Dimensions: 50 x 50 cm.

Anti-shock flooring, designed for the setting up of sports centers, gyms, weight rooms. Specially made to ensure maximum safety for athletes during their training sessions. Its peculiarity consists in the **high density of the rubber granules** from which it is made, making it ideal for absorbing impacts resulting from shocks or the release of weights. Equipped with a smooth non-slip surface, aesthetically beautiful and velvety to the touch. Capable of protecting even the underlying surfaces, thanks to its draining and permeable power. Easy to install and clean.

Technical characteristics:

- Dimensions: 50 x 50 cm
- Thickness: 20 mm
- Material: rubber granules from recycled end-of-life tires
- Fixing: direct laying and/or gluing
- Available in red or black
- Minimum purchase quantity 8 pieces (2 sqm)
