

Antibacterial transfer board for the disabled h664_11

Non-folding patient transfer roller in Teflon. Max capacity: 200 kg. Dimensions: 80 x 40 cm.

The transfer board for the disabled is an indispensable product for bedridden patients and people with mobility difficulties who therefore need help to be **transferred from one surface to another** in a safe and simple way. The **non-folding transfer roll** features a structure formed by an internal core in a special **light foam**, while the external part is covered in **Teflon with a coated protective coating**.

The transfer sheet features **removable and interchangeable** exit edges and no metallic or magnetic parts. The product undergoes an **antibacterial treatment** to ensure hygiene and cleanliness and can be easily disinfected.

Technical features:

- Material: internal light foam, Teflon sliding coating
- Max capacity: 200 kg
- Radiotransparent
- Non-folding
- Dimensions: 80 x 40 cm

The antibacterial transfer board for the disabled h664_11 is also available on the MEPA portal. Discover how to find our company on the [Public Administration portal](#).
