

Automatic parking bollard H972_68

Automatic parking bollard H972_68 in black/yellow steel, solar-powered, with 15m remote control, anti-shock siren and 3.7V lithium battery. Ideal for reserved condominium and corporate parking spaces.

The **H972_68 parking bollard** is an automated solution for the **protected management of reserved parking spaces** in condominium, corporate, and private contexts. It allows for quick and remote control of parking access, solving the problem of protecting assigned spaces without manual intervention.

The system operates via **solar energy**, eliminating the need for permanent electrical connections or periodic replacements of conventional batteries. It is equipped with a **3.7V rechargeable lithium battery** that accumulates energy during the day and ensures continuous operational autonomy.

The remote control technology allows for **opening or closing the barrier arm via remote control within 15 meters**, with an **operating speed of 5-6 seconds**. When the bollard is raised, it physically prevents access to the parking space. A **siren activates automatically in the event of an impact or tampering attempt**, providing protection and a deterrent against unauthorized manipulation.

The **black and yellow painted steel** structure ensures **high resistance to atmospheric agents and high visibility** even from a distance. The battery recharges completely in **2 hours with the included charger**. The product comes with **2 remote controls and 3 fastening elements** for stable floor anchoring.

Technical features

- **Main material:** steel
- **Main color:** black/yellow
- **Power supply:** solar panel with 3.7V lithium battery
- **Remote control:** 2 remote controls included, 15 m range
- **Charging time:** 2 hours
- **Opening speed:** 5-6 seconds
- **Safety function:** siren in case of impact and tampering attempts
- **Closed dimensions:** 460 × 430 × H 70 mm
- **Open dimensions:** 460 × 320 × H 390 mm
- **Net weight:** 6 kg
- **Fastening elements included:** 3 elements
