

Automatic shoe shine machine with bar h14211

Automatic shoe shine machine with foot sensor and timer. Available in different colors.

The shoe shine machine is a heavy and solid machine, which is a very popular model for hotel floors, spacious shopping centres or capacious administrations. The three brushes have an impressive diameter of 22cm x 8cm in width and are extremely durable – together with the solid steel machine a long-term usage is guaranteed. The ergonomic stainless steel handle bar provides a secure hold for the user. The honeycombed rubber mat can be removed for easy cleaning of the machine's ground thus turning both versions into a "shoe shine butler", which is ready-for-use at any time.
