

Long-distance belt retractor h16222

360° rotatable wall-mounted belt retractor with belt available in various colors. Available with belt lengths of 12 or 22 meters.

Wall-mounted belt retractor ideal for both indoor and outdoor use.

Thanks to the long belt length, this barrier is ideal for restricting access to large areas such as stations and airports.

The compact dimensions and the swiveling body make this product extremely versatile and suitable even for industrial environments.

The product is equipped with an integrated **centrifugal brake** to control the belt in case it is accidentally released.

The **belt**, made of a protective and stable fabric, is available in various colors.

Technical characteristics:

- Belt width: 50 mm
- Housing color: Black, Satin chrome
- Belt color: Neon yellow, white/red, Black/yellow, Black
- Material: aluminum
- Mounting: permanent
- Outdoor use: yes
- **Optional: wall receiver**

The product is available in two versions:

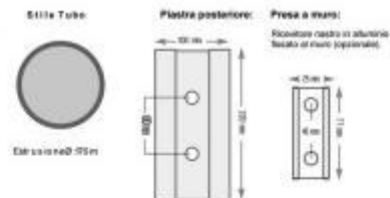

- **Belt length 12 meters** - total weight approx. 4 kg
- **Belt length 22 meters** - total weight approx. 5 kg

Upon request, various belt attachment systems can be added to this product.
