

Baby and child weighing scale h13_134

Medical scale for infants and children. Capacity: 20 kg. Dimensions: W55.2 x D15.6 x H33.2 cm.

Infant weighing scale ideal for hospitals, clinics and pediatric practices. Designed to be used both for birth weight measurement and for monitoring weight gain during growth; in fact, by removing the weighing tray, the scale can be used as a regular floor scale for children. Complete with **Breast-Milk-intake function**, which allows determining the amount of milk the infant consumes after a feeding.

Technical features:

- Dimensions: W55.2 x D15.6 x H33.2 cm
- Capacity: 20 kg
- Battery operated
- Sensitivity: 10 g 20 g
- Weight: 2.8 kg
- With Breast-Milk-intake function
- Other functions: tare, automatic hold, kg/lbs conversion, automatic shut-off
- User manual included
