

Bag holder bin for restaurants h86_104

Professional 50-liter stainless steel bin with pedal opening and wheels, HACCP compliant for industrial kitchens and hospitality settings.

This **waste bin** has been specifically designed to meet the rigorous hygienic requirements of professional kitchens in hotels and restaurants. The **stainless steel** structure ensures superior corrosion resistance and ease of sanitization essential in food contexts, ensuring full compliance with **HACCP regulations**.

The **large-surface pedal** opening system allows for hands-free use, minimizing cross-contamination risks. Safety and ergonomics are further guaranteed by the lid with **hermetic closure**, designed to seal unpleasant odors inside the container. Mobility is smooth and safe thanks to **two integrated wheels**, which allow the unit to be moved even when fully loaded, while the lower base provides structural support for the bag, preventing accidental tears due to contact with the floor.

Technical features

- **Dimensions:** L59 x P43 x H75 cm
- **Capacity:** 50 liters
- **Weight:** 3.90 kg
- **Material:** High-resistance stainless steel
- **Opening system:** Reinforced mechanical pedal
- **Lid:** In rubber with hermetic seal profile
- **Mobility:** Rear wheels with parking system
- **Certification:** HACCP protocol compliant
- **Notes:** Bag not included; shipped in assembly kit
